

**HUNTERS POINT NAVAL SHIPYARD
BASE REALIGNMENT AND CLOSURE CLEANUP TEAM
MEETING NOTES
June 8, 2018**

These notes summarize the Navy Base Realignment and Closure (BRAC) Cleanup Team (BCT) meeting for Hunters Point Naval Shipyard (HPNS) in San Francisco, California. The meeting was held on June 8, 2018 at the U.S. Environmental Protection Agency (USEPA) offices in San Francisco, California.

I. Introductions and Agenda Review

Mr. Derek Robinson (Navy) conducted introductions and reviewed the action items from the May 8, 2018 BCT meeting.

II. Navy Business/Action Items (Derek Robinson, Navy)

There was one action item from the May 8, 2018 BCT meeting which is still pending. Ms. Danielle Janda (Navy) noted that the petroleum closeout report for the Parcel B combined site has not been issued since more work is being done at the site.

Mr. Robinson (Navy) noted that the Navy is preparing a summary in response to the most recent accusations made by former Tetra Tech employees. He will share that summary with the BCT when it's finished. Ms. Lily Lee (USEPA) asked if the Navy was looking at the data sent by the lawyer for the former Tetra Tech employees. Mr. Robinson noted that they are reviewing the manhole data. It is likely that the manhole was removed due to substantial grading that occurred on Parcel A. Regarding the allegations concerning trucks from Parcel E-2 dumping soil on the Lennar stockpile, Mr. Robinson noted that they have talked to the Parcel E-2 contractor and radiological quality control contractor and they have no reason to believe that soil was removed from Parcel E-2.

III. Document Tracking/Upcoming Fieldwork (Danielle Janda, Navy)

Ms. Janda (Navy) noted that the Navy recently released the Building 211/253 radiological work plan for Parcel C and the Land Use Control Remedial Design (LUC RD) for Parcel E. Ms. Nina Bacey (Department of Toxic Substances [DTSC]) noted that the original work inside the building which identified the areas of concern was done by Tetra Tech. Ms. Janda noted that the current contractor is resurveying the building and will not use any of the Tetra Tech's data to release the impacted areas of the building. Mr. Matt Wright (California Department of Public Health [CDPH]) asked if the Navy has selected the sampling area on HPNS to collect the background samples for the project. The Navy is reviewing new reference areas for the radiological rework at HPNS and will evaluate if those background samples should also be applied to the Building 211/253 remediation.

Ms. Janda noted that the Navy has some upcoming fieldwork in Parcel C.

IV. Miscellaneous Topics/Updates (Derek Robinson, Navy)

Mr. Leo Larson (Navy) noted that there are two monitoring wells in UC-2 that were destroyed by Lennar during redevelopment. Lennar is looking to replace both wells but the Navy noted that one well was upgradient and historically did not have concentrations of contaminants above cleanup levels while the other consistently did. The Navy asked the BCT if they would accept the Navy installing the well that had the elevated concentrations and not installing the other well. Mr. Larson is sending the BCT some maps and data with respect to these two wells and will follow up with the BCT.

Ms. Tina Low (Regional Water Quality Control Board [Water Board]) asked if the two wells near the slurry wall on Parcel E-2 would be reinstalled. The wells were removed during fieldwork but the Navy said they would be replaced. Ms. Janda noted that they are going to reinstall the wells during Phase III of the cleanup but the Navy will verify and report back.

Mr. Robinson (Navy) noted that the Navy was hosting two community bus tours on June 9, 2018. There has been lower interest in these bus tours than in the past. There will be some press on the tours but the Navy will not be conducting interviews.

The Navy has prepared a radiological work plan fact sheet for the upcoming work on Parcel G. The Navy is going to hold back issuing the fact sheet until after the media advisory is issued. The Navy is meeting with the media on June 13, 2018 to discuss the upcoming radiological rework.

Mr. Robinson (Navy) noted that the Navy is working with Keller Canyon landfill and will be doing a presentation concerning the landfill on June 21, 2018.

V. Action Items/Future Meetings (Mr. Robinson, Navy)

- The Navy will follow up with the BCT regarding the two replacement monitoring wells Lennar is planning to install on Parcel UC-2.
- The Navy will follow up with the BCT regarding replacement monitoring wells near the slurry wall at Parcel E-2.

Next Meetings:

- The next BCT is scheduled for July 11, 2018 at the Navy trailer on HPNS.

Meeting participants:

Jeff Austen, Geosyntec*

Nina Bacey, DTSC*

Liz Basinet, Noreas*

Karla Brasaemle, TechLaw*

Amy Brownell, City of San Francisco

Jerry Cooper, Gilbane*

Kellie Koenig, Jacobs*

Jackie Lane, EPA*

Leo Larson, Navy*

Tina Low, Water Board*

Sharon Ohannessian, Navy*

Chris Ota, Navy*

Julie Pettijohn, DTSC*

Jamie Egan, APTIM
Mitra Fattahipour, Insight*
Hamlet Hamparsumian, Noreas*
Judy Huang, EPA
Danielle Janda, Navy

Christina Rain, LANGAN
Derek Robinson, Navy
Matt Wright, CDPH*
